

## Band Info (41 years of Herbärds)

After 17 years of abstinence from the stage, the Herbärds had their live comeback in 2017 at the the book presentation and exhibition "How punk came to Stuttgart". Since then they are regularly back on stage again and have recorded 2 new records. The new album "Alte Straßenköter" is released in September 2023 on Label Sunny Bastards Records.

Herbärds emerged in 1982 from the band "Total Kaputt", founded by guitarist Oimel in 1979, making them one of the first German Oi/Punk bands. The sound is old punk/street punk with mostly German lyrics, which deal with everyday and socially critical topics. The fun of playing music has always been the foreground for the

Herbärds. The band clearly and distinctly distinguishes itself from the right-wing scene!

The Herbärds have played at various festivals in recent years, including the Punk & Disorderly festival in Berlin and the Umsonst und Draußen festival in Stuttgart. In many club concerts in Germany and Switzerland they had the privilege of playing with bands like Cockney Rejects, UK Subs, Sham 69, Cock Sparrer, Evil Conduct, Los Fastidios, Normahl and many more. In 2019, the Herbärds wrote the new official anthem of the Stuttgart Rebels ice hockey team.
